EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Tom Freiburger on 2/12/04.

The application has been amended as follows: In the claims, see pages 5 and 6.(attachment)

The title has been changed to –Method of manufacturing a release-controlled pipe.

Interview Summary

Applicant agreed to amend the claims to place the claims in the present tense, to fix confusing language, and to fix antecedent basis problems.

Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance: the prior art of record does not teach or fairly suggest a method of forming a porous pipe wherein the polymer after being extruded, is ground and portions of it are placed in water while portions remain dry, such portions then being extruded together to form a porous pipe. While Ligon, Sr. et al.(U.S. Patent 6,398,997) suggests soaking the polymer, it soaks all

Art Unit: 1733

the chopped polymer rather than only a portion of it. In Mason(U.S. Patent 4,616,055) all the pellets are formed by chopping the extruded material in a water bath, the pellets then being de-humidified rather than soaking a portion of ground pellets. In DeMello et al.(U.S. Patent 5,607,629) the water is injected into the barrel of the extruder rather than being present in the pellets before they are melted by the extruder.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
